

Dear Writers, Publishers, Readers and Investors,

We are excited to present BlockBooks, a new platform that revolutionizes the way books are published and consumed using Web3 technologies. BlockBooks is a decentralized platform that leverages blockchain, NFTs, smart contracts, and digital wallets to create a secure, transparent, and efficient ecosystem for authors, publishers, and readers.

Our vision is to create a global community of readers and writers where creativity, ownership, and financial rewards are shared fairly and transparently. We believe that the Web3 technologies provide an opportunity to create a new model for the publishing industry that empowers authors and readers alike.

BlockBooks offers a range of innovative features that set it apart from traditional publishing platforms:

**Tokenized books:** All books on BlockBooks are tokenized as NFTs, giving authors complete control over their work and allowing readers to purchase and own a unique digital asset that represents the book.

**Smart contracts:** Our platform uses smart contracts to automate payments, royalties, and other financial transactions between authors, publishers, and readers, eliminating the need for intermediaries and reducing costs.

**Digital wallets:** BlockBooks offers built-in digital wallets that allow users to securely store and manage their tokens, enabling instant and transparent payments for books, subscriptions, and other services.

**Community-driven:** Our platform is designed to foster a strong and engaged community of readers and writers, with features such as forums, messaging, and reward programs that incentivize participation and contribution.

We are seeking investment and partnerships to help us develop and launch BlockBooks. We believe that our platform has the potential to disrupt the publishing industry and create a new model that benefits everyone involved. With your support, we can make BlockBooks a reality and build a thriving global community of readers and writers.

Thank you for your consideration. We look forward to working with you to bring BlockBooks to life.

Sincerely,  
BlockBooks team
